Description

Is the glove box on your Z3 *sagging*? Are you able to easily pull it open even while locked? Does your glove box have the infamous BMW *rattle*? How familiar does the picture below look?

If these are symptoms that your Z3 has, pick up this kit! The kit includes:

- (1) Structural Support Bar (straightener)
Made from high carbon steel for strength
- (4) **Black Zinc Plated Bolts (resists corrosion beautifully) NEW!**
- (4) Kep Nuts (to lock the assembly in place) **NEW!**
- (1) Instruction Manual

*Note: I have upgraded the kits to now include attractive **Black** zinc plated bolts and combination kep nuts.

Not only will it fix the squeaking, rattling, and sagging, it will greatly increase the amount of effort that it takes to break into the glove box. This allows you to lock personal items in your glove box and leave your top down with confidence.

How hard is this kit to install?

- It only takes one hour and can be done by anyone. There is NO drilling or other custom work that must be done.

Will the fix be visible?

- No, not at all. Even from looking up underneath you will not be able to see it. This is really a nice kit!

What tools are needed?

- A flat head screwdriver, Phillips head screwdriver, and possibly a wrench for tightening up the bolts.

Save yourself \$300 at the dealership and fix this yourself. This kit fits all years that the Z3's and M Roadster's were produced (96, 97, 98, 99, 00, 01, 02). I am unsure if it will fit the e39, e36, e34, e46, e21, or e46. Dinan 1996 1997 1998 1999 2000 2001 2002
